

Pete Armitage | UX/UI designer

About Pete

I am a designer with a penchant for storytelling. My career began in marketing in the music industry, where I first fell in love with creating and designing content.

I am exhilarated by technology - and focusing on solving UX problems with user research, wireframing, prototyping and usability testing.

I am deeply passionate about my work and driven by the prospect of galvanising positive change in the world by employing a user-centred design process.

I am friendly and curious and eager to help others.

Education

University of Leeds

BA (Hons) *Philosophy & Linguistics*

Ironhack Berlin

Intensive UX/UI design course (450+ hours)
